Portfolio: <https://siddharthgaikwad.vercel.app>

PROFILE SUMMARY

B.Tech student and self-driven web developer skilled in building full-stack applications with Next.js, React, and MongoDB. Independently designed, built, and deployed multiple live projects covering URL shortening, creator platforms, credential management, and responsive UI development. Comfortable across the stack, from responsive frontend interfaces to backend APIs, database integration, and deployment.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, Bootstrap, Responsive Web Development

Backend & Database: MongoDB, REST API Development

Tools & Deployment: Git, GitHub, Postman, Vercel, Cloudflare Workers

PROJECTS

ShortyURL | *Next.js 16, React, Tailwind CSS, MongoDB, Vercel*

A privacy-focused URL shortener that lets users create short, shareable links without requiring an account or login.

- Built custom short URL creation with duplicate URL detection and no signup required
- Implemented recent link history using localStorage and one-click copy/open functionality
- Designed a responsive, fast UI with MongoDB-powered URL storage and redirection, deployed on Vercel

Live: <https://shorty-url-indol.vercel.app> GitHub: <https://github.com/siddharthgaikwad-git/ShortyURL>

SocialTree | *Next.js, MongoDB, MongoDB Atlas, Tailwind CSS*

A Linktree-style platform where creators can build a profile and share links/content with their audience.

- Developed creator profile pages with link/content sharing functionality
- Integrated MongoDB Atlas for data persistence and built a modern, responsive frontend UI

Live: <https://socialtree-psi.vercel.app> GitHub: <https://github.com/siddharthgaikwad-git/socialtree>

Get Me a Chai | *Next.js, Tailwind CSS, MongoDB*

A creator-support platform where creators showcase profiles and receive support from their audience.

- Built creator profile pages with support/donation-style interaction functionality
- Implemented database-backed storage with a clean, responsive interface

Live: <https://get-me-a-chai-sigma.vercel.app> GitHub: <https://github.com/siddharthgaikwad-git/get-me-a-chai>

Password Manager | *Next.js, Tailwind CSS, MongoDB*

A full-stack application for securely organizing and managing login credentials.

- Implemented full CRUD functionality — save, edit, delete, and access stored credentials
- Built a clean, database-backed UI for credential management
